

AMENDMENTS TO THE DRAWINGS

Please amend Figure 1 by replacing it with the attached replacement sheet.

REMARKS

The present application has been reviewed in light of the Ex Parte Quayle Action dated April 2, 2010. Claims 1, 3-9, and 12-19 are pending, of which Claims 1 and 12 are in independent form. Claims 3 and 13 have been previously cancelled. No new matter has been added.

The Applicants would like to thank Examiner Pritchett for his time and consideration extended to the Applicants' representative, Theo Kountotsis, during a telephone interview conducted on May 5, 2010. During the interview, the Applicants representative and Examiner Pritchett discussed the objection to the drawings. The Applicants have considered and incorporated Examiner Pritchett's helpful suggestions in the drawings.

Specifically, regarding the objection the drawings, the Examiner stated that the rotatable polarization mirror and display device must be shown or the features cancelled in the claims. Applicants have amended the drawings as suggested by the Examiner during the telephone conference. Specifically, Applicants have added arrows indicating "rotation" of the mirror 2 and the display device 5. A replacement sheet is attached illustrating such changes. Accordingly, Applicants respectfully request entry of the replacement sheet and that the objection to the drawings be withdrawn.

COMMENTS FOR STATEMENTS FOR REASONS FOR ALLOWANCE

Additionally, the Examiner indicated that Claims 1, 4-9, 12, and 14-19 are allowed. Applicants wish to thank the Examiner for stating that the claims are allowed. In the Ex Parte Quayle Action, the Examiner further indicated reasons for allowance.

In particular, the Examiner states:

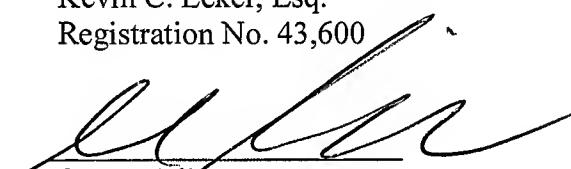

“Examiner interprets the claim language as requiring both the display device and the polarization mirror to physically rotate not just switch the kind of polarization transmitted through the use of electrical voltage applied to the polarization mirror and the display device.”

Even though the Examiner interprets the allowed claims as stated above, it is Applicants' contention that there is no particular limitation or feature in the allowed claims that is more critical than any other, and the allowed claims shall not be interpreted in any particular manner. As such, the Examiner's interpretation stated in the Ex Parte Quayle Action should not be construed as a surrender by Applicants of any other interpretation.

In view of the remarks presented above, Applicants respectfully submit that a Notice of Allowance should be issued.

Respectfully submitted,

Kevin C. Ecker, Esq.
